

## **Data Recovery**

**Data loss can cost your business not only the down time but also your reputation.** We always advise that you follow a back up routine so in the event of hard drive failure for example you can be up and running as quickly as possible. However, if you need to recover your data we have a Data Recovery Solution to help.

Our Data recovery solution has a minimum charge of £35 - we will then give you a report on what data can be recovered. If you wish to then go ahead we will give you a estimate of the time & cost to cover your data and you can decide if you want your recovered data to be moved onto CD, DVD or a new hard drive.

### **Data Recovery Solution:**

- £35 minimum charge
- Data is normally recovered within 72 hours
- Includes SATA and IDE drives failure
- Data can be restored to CD, DVD or hard disk drive as required
